

### IN THE CLAIMS

This Listing of Claims will replace all prior versions, and listings, of claims in the subject Patent Application:

Listing of Claims:

1-20. (Canceled).

21. (Currently amended) A transfer sticker having metal powder made by an electroplating process, the transfer sticker comprising:

- a substrate;
- a first isolating layer coated on the substrate;
- a resin layer detachably coated directly on the first isolating layer;
- a metal powder layer electroplated on the resin layer;
- a first protective resin layer printed on the metal powder layer in patterns;
- a second protective resin layer printed to overlay and capture ~~on~~ the first protective resin layer over the metal powder layer to protect the patterns;
- an adhesive layer coated on the second protective resin layer; and
- a second isolating layer detachably covering the adhesive layer.

22. (Previously presented) The transfer sticker as claimed in Claim 21, wherein the substrate is made of materials selected from the group comprising paper and plastic membrane.

23. (Currently amended) The transfer sticker as claimed in Claim 21, wherein the first and second isolating layers are made of materials selected from the group comprising: wax and silicone.

24. (Previously presented) The transfer sticker as claimed in Claim 21, wherein the resin layer, the first protective resin layer and the second protective resin layer are all made of resin.

25. (Currently amended) The transfer sticker as claimed in Claim 24, wherein the resin layer is transparent and formed with a predetermined color~~ful~~.

26. (Previously presented) The transfer sticker as claimed in Claim 21, wherein the second protective resin layer coating the first protective resin layer has an equal or larger area than the first protective resin layer.

27. (Previously presented) The transfer sticker as claimed in Claim 21, wherein the second protective resin layer is composed of multiple layers.

28. (Previously presented) The transfer sticker as claimed in Claim 27, wherein at least one of the multiple layers of the second protective resin layer is mixed with colors.

29. (Previously presented) The transfer sticker as claimed in Claim 27, wherein at least one of the multiple layers is mixed with fluorescence materials.
